

# Dr Stocks Frontend Setup Guide

---

How to setup frontend services?

1. Unzip the zip file into a folder
2. Copy the frontend folder to the "www" folder in your "wamp64" folder on your C: drive eg. "C:/wamp64/www/"
3. Next, make sure that your WAMPServer is running. If it is not, please run it
4. Enter this URL in your browser: [http://localhost/dr\\_stocks-frontend/index.html](http://localhost/dr_stocks-frontend/index.html)

This is the login page of our website

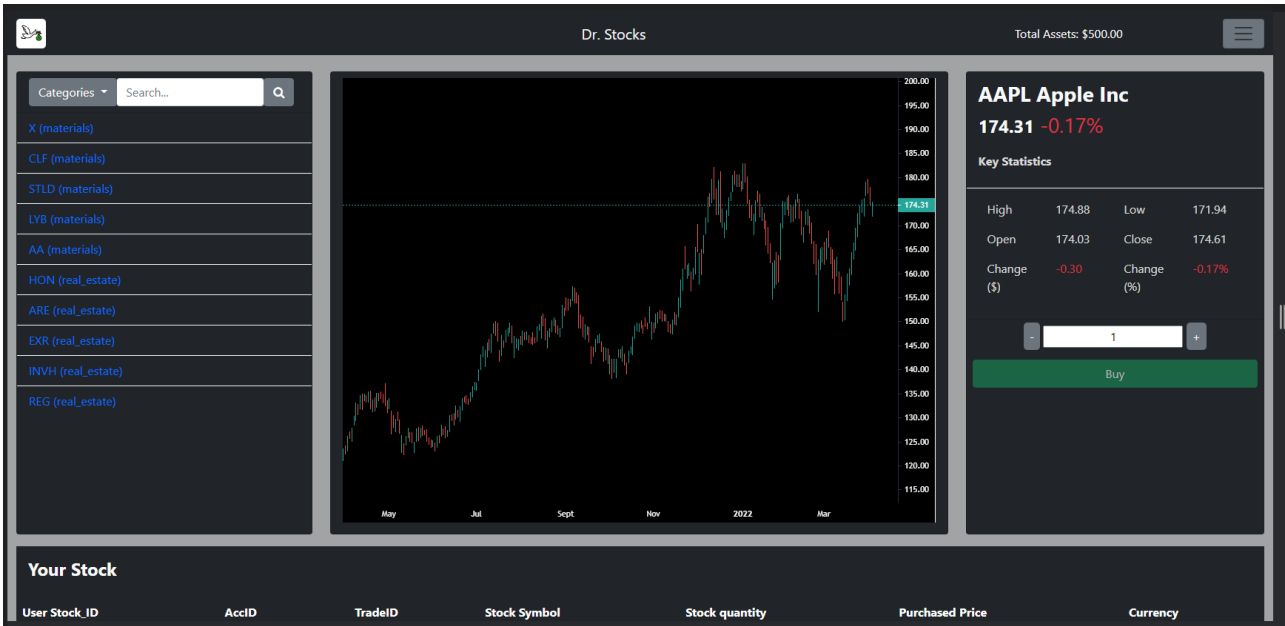

5. You can then login using this account details:

Email: [ezekieltheprophet55@gmail.com](mailto:ezekieltheprophet55@gmail.com)

Password: temp

6. Next, you will be redirected to this main page

\*Note if you did not get redirected to the main/dashboard page, this may be due microservices still in the starting up process or KONG api gateway establishing the services and routes. Thus, please wait for around 1 minute before trying to log in again.

With this, you have successfully setup this project and please feel free to try out this project!
